

Federal Energy and Water Management *2016 AWARDS*

Program Category

North Carolina ANG

The 145th Civil Engineer Squadron, Charlotte/Douglas International Airport Air National Guard Base (Charlotte ANGB), has created an exceptional energy management team that encompasses a myriad of initiatives and programs, resulting in outstanding energy savings as well as substantial quality of life improvements for its customers. Energy savings initiatives through conventional heating, ventilation, and air conditioning (HVAC) systems upgrade projects, direct digital control (DDC) and smart meter improvements, systems monitoring, and lighting upgrades are combined with base wide educational initiatives, improved maintenance, and reporting to provide a fully integrated program the entire base population is involved with and supporting.
