

Federal Energy and Water Management 2016 AWARDS

Program Category

WPAFB Energy Action Team

The Wright-Patterson Air Force Base Energy Management office focuses on using energy efficiently while conserving energy and materials. These actions effectively reduce overall energy use and greenhouse gas emissions. The program includes three integrated but geographically separated landmasses encapsulating the entire base footprint broken down as area's A and B encompassing about 16 million square feet of facility infrastructure. In FY2015, Wright-Patterson saved over 301,387 million BTUs against the 2003 Baseline of EAct 2005 goals for a total of 15% reduction in overall energy intensity.
