

Introducing the Resilience Integration Directorate

The Department of the Air Force's priority is mission assurance. Installation resilience is how SAF/IEE delivers it.

Focus Areas

Planning, Programming,
Budget & Execution
Oversight

Climate-Informed
Resilience

Sustainability

Net Zero Approach

Microreactor Program

Cybersecurity

Climate Adaptation

Resilience Integration

In January 2023, the Office of the Deputy Assistant Secretary of the Air for Environment, Safety, and Infrastructure (SAF/IEE) stood up its sixth Directorate, "Resilience Integration." Driven by ever-changing and increasing threats facing the enterprise, the Resilience Integration directorate will tackle challenges to natural and built infrastructure, energy, cyber, and response. Our investments, programs, and procedures must be optimized to deliver mission assurance and resilience from our power projection platforms. Doing so requires integration across tools, stakeholders, domains, geographies, and capabilities.

Our Mission:

Integrating resilience and sustainability activities through stakeholder coordination across SAF/IEE and its federal, state, and Department of the Air Force partners for more efficient, effective, and strategic outcomes.
